The S4K4UC and S4K6UC features true On-Line (double conversion) topology providing the ultimate in protection against a wide range of potential power problems. The S4K4UC design of two 3 kVA, 120 ...

The Minuteman<sup>®</sup>; Endeavor(TM) 6 & 10kVA Tower Series UPS combines transient free pure sine wave output and extended runtime capability for critical applications. A front-panel LCD display provides ...

Nominal (Nom) current is based on full rated output load at nominal input voltage. Maximum (Max) current is short duration for battery recharge conditions. UPS input cables must be run in separate ...

For uninterruptible power supplies with ratings of 10kVA and below, the output power factor is often stated as being 0.7. Therefore a 10kVA single phase input, single phase output UPS at 0.7PF would ...

**SPECIFICATIONS** Legrand UPS model KEOR T EVO 10 is an uninterruptible power source with 3-Level IGBT switching technology, high frequency PWM technology, Double Conversion On-line, passing ...

This modular lithium-ion battery UPS accepts single-phase 208V or 240V AC input and provides single-phase 120V or 240V AC output. The tower-type system includes two internal lithium-ion battery ...

Input power factor With filter. The charging current is determined by the battery capacity. Default is 0.1 C. Was this helpful?

The UPS provides filtered output, protecting against AC power line irregularities such as blackouts, sags, surges, spikes, lightning and electro-magnetic interference (EMI) that can be induced onto the ...
