The 24U cabinet can accommodate up to four 30kW DC power supplies or up to four 30kW regenerative DC loads. Power levels to 120kW are supported by this cabinet size.

This reference design is a two-stage, high-efficiency, 30kW power supply with a high voltage DC (HVDC) output. The first stage is a three-level flying capacitor power factor correction (PFC) ...

The 30kW DC rack power system provides a high-capacity, resilient DC power solution designed specifically for telecommunications infrastructure, data center operations, and industrial applications ...

TM APM is an efficient, space saving and flexible solution for your network. TM compact, single frame 19" enclosure, Liebert® APM keeps your network protected while saving on cost and data center space.

Cabinet systems that use a modular, holistic approach to integrating thermal and power management facilitate cost-effective scalability for data centers to support increasing rack power densities while ...

Data center managers are faced with increasingly challenging demands: supplying additional computing power using less energy in a smaller space, while staying within budget constraints and maintaining ...

The space-saving PDU is easy to move and adapt to the future demands of the data center. The PDU offers superior power protection and monitoring, and the flexibility and scalability to match your actual ...

For power distribution requirements of medium to large data centers, Delta's Power Distribution Unit (PDU) is an optimal solution. The space-saving PDU is easy to move and adapt to the future ...
