What is a 3KW solar power system?

3KW solar power system (off-the-grid, standalone) is the obvious alternative to one that is grid-tied. For homeowners that have access to the grid, off-grid solar systems are usually out of question. Here's why:

What is a 3KW off grid Solar System?

3KW Off Grid Solar System is a great option for people with average power use, living in small homes. They are particularly suited to small families or couples. Optional Mono/Poly Blue/Black Panels High Efficiency with PERC panels available 25 years warranty with 80% power output PV Array Combiner Box SPD surge protection etc

How many solar panels do you need for a 3KW system?

How many solar panels you'll need in order to construct a 3kW system will completely depend on your panels' peak power ratings. For example, if your installer only has 300W solar panels in stock, you'll need 10 panels. Or if you get 430W panels, you'll have seven solar panels in your 3kW system.

How do I create a 3KW Solar System?

You can create a 3kW system by purchasing solar panels with power ratings that add up to 3,000 watts (W) when connected to each other - for example, seven panels that are all rated at 430W.
