Containerized package plants offer a portable, plug-and-play solution for water and wastewater treatment. They are ideal for remote locations, emergency response, or temporary needs, providing ...

Pure Aqua's containerized water treatment plants are designed to be plug and play. The equipment is equipped, attached, reinforced and tested in our industrial factory.

Flexible, pre-engineered, pre-assembled, ergonomic portable units, for every type of water treatment system installed inside standard 20" or 40" insulated containers.

The containerized structure of our membrane water treatment system makes it flexible and versatile for a variety of applications, such as municipal wastewater treatment plants, commercial sewage ...

A water treatment plant in container is a complete solution, assembled and tested off-site at our factory. The solution is complete with all internal piping and wiring factory-built.

These mobile systems are installed inside a seaworthy 20 or 40 ft containers or in combination to form complete systems with advanced water treatment and purification technologies.

With 13 consecutive purification stages, this mobile solution represents all the processes performed at a drinking water plant, providing safe, soft, and healthy to drink water.

Small size purification plant: inserting a water treatment plant in a container simplifies the final assembly and saves the overall costs due to reassembly. Elimination of the need for protective covers: ...
