The project, which pairs the DC-coupled battery with an 80 MW AC solar farm, marks a significant step in Australia's transition to co-located hybrid renewable energy and storage solutions.

Australia's position as a testing ground for advanced energy storage technologies extends beyond DC coupling to grid-forming battery storage, where the country is among the early global ...

Wärtilä Energy Storage has announced plans to develop what it claims will be the largest DC-coupled hybrid battery energy storage system (BESS) in Australia's National Electricity ...

Finnish energy giant Wärtilä has announced the latest addition to its massive network utility-scale battery energy storage system (BESS) projects in Australia: a record-breaking 1.5 GWh...

Technology group Wärtilä said the company will deliver the largest DC-coupled hybrid battery energy storage system (BESS) in the National Electricity Market (NEM) in Australia, reflecting...

Technology company Wärtilä is set to provide a significant energy storage system in Australia, marking its second DC-coupled project in the country.

Unlike traditional power supply projects, this project prioritizes optimizing grid load and enhancing the role of energy storage systems in renewable energy generation, which is essential for ...

Technology group Wärtilä will deliver a large energy storage system in Australia, which will be Wärtilä's second DC-coupled project in the country.
