Is solar energy a solution to Syria's electricity crisis?

After more than thirteen years of war, Syria's electricity crisis has only deepened, compounding the suffering of its people. The former Assad government failed to secure stable energy supplies, and as shortages worsened and fuel prices soared, the regime turned to solar energy projects as an alternative, seeking to mitigate the crisis.

Is solar energy a viable option in Syria?

As the electricity crisis worsens, solar energy is no longer just an option - it has become an unavoidable necessity. Yet the high cost of installing photovoltaic systems has pushed many Syrians to rely on subsidized loans, particularly those provided by the Renewable Energy Support Fund, which offers interest-free financing.

Where do solar panels come from in Syria?

However, renewable energy equipment does not enter Syria easily. Four importers we spoke to confirmed that most solar panels and batteries are shipped from China to Syria through Jebel Ali Port in the UAE or, at times, the Port of Aqaba in Jordan.

Is putting solar panels on roofs a solution in Syria?

"The solution to the problem isn't putting solar panels on roofs," Syria's interim Energy Minister Mohammad al-Bashir told The Associated Press. "It's securing enough power for the families through our networks in Syria. This is what we're trying to do."

Syria's new leaders are hoping renewable energy will now become more than a patchwork solution.

Investment is beginning to return to the country with the lifting of U.S. sanctions, and major energy projects are planned, including an industrial-scale solar farm that would secure about a tenth ...

Following the removal of US sanctions, Syria plans to focus on renewable energy and infrastructure repair to address its ongoing energy crisis. With the lifting of US sanctions, Syria is ...

Syria is working to rebuild its energy sector after years of civil war and crippling sanctions. The country has suffered severe electricity shortages, with only those who can afford them using ...

A limited group of importers controls the flow of solar panels and batteries, in the midst of complex customs procedures and trade policies imposed by major importers, most of whom are ...

This in-depth editorial investigates how solar energy is becoming a national priority in Syria, the motivations behind the move, the challenges on the ground, and what the future may hold.

Investment is beginning to return to the country with the lifting of U.S. sanctions, and major energy projects are planned, including an industrial-scale solar farm that would secure about a...

Yet its path toward solar power has been driven less by strategic foresight than by the pressures of necessity, unfolding as a story of resilience, adaptation and uneven progress. Across ...
