AIT is a pioneer in the research, development, and testing of innovative functionalities for grid-connected inverters, enabling a high share of decentralized renewable energy to be integrated into the power grid.

The inverter series have met the strict requirements of the Austrian distribution grid operators and are now officially approved.

Fronius launched its first grid-connected solar inverter back in 1995. All Fronius solar inverters are Engineered, Designed and Manufactured in Austria. Fronius Inverters have maintained the top spot ...

Below, we describe the four main inverter types used for on-grid and off-grid solar systems. Learn more about the different types of solar systems and how they work.

Discover inverters for every application - whether hybrid, off-grid, or grid-connected. High-quality devices for maximum efficiency.

The company specializes in renewable energy solutions, particularly photovoltaic solar cells and technologies, and offers integrated solar inverters as part of its product line, promoting sustainable ...

Even in Austria with its quite high share of hydropower, PV might finally contribute by more than a third to the national electricity production, according to the national "integrated grid infrastructure plan".

Senmarck recently passed Austria OVE R25 tests, organized by AIT SmartEST Laboratory in Austria. Now Senmarck can support more Austrian customers to enjoy green energy ...
