We partner with commercial energy users in the medical market to maximize reliability, achieve long-term cost predictability and enable preparedness and energy security.

These rugged, self-contained systems integrate large solar arrays, advanced battery storage, and high-capacity fuel cells -- with optional diesel redundancy when regulatory or client requirements demand it.

Discover how battery energy storage ensures uninterrupted power for hospitals, protecting critical loads and enhancing energy resilience with FFDPOWER solutions.

The North American energy storage market grew by 214% year-over-year in 2022 (Wood Mackenzie). Mobile Battery Energy Storage Systems (BESS) act like "energy Swiss Army knives" - providing ...

For high availability and reliability IQUPS is a modular energy storage system: batteries and control electronics are inserted in cabinets as plug-in units. This facilitates maintenance and the exchange of ...

Adding Containerized Battery Energy Storage System (BESS) to solar, wind, EV charger, and other renewable energy applications can reduce energy costs, minimize carbon footprint, and increase ...

Learn how containerized clinics and hospitals deliver rapid, scalable healthcare anywhere. Explore design, uses, and deployment with Storage On-Site.

Explore five innovative ways storage containers are transforming healthcare. Learn how they enhance organization, safety, and efficiency in medical settings!
