Can new technology transform business operations in Papua New Guinea?

New and emerging technologies have the potential to radically transform business operations, driving e-commerce, cloud computing and efficiencies in supply chains and manufacturing. Business Advantage PNG asks some technology experts how some of these technologies may be deployed in Papua New Guinea.

Could a Papua New Guinea 'end state' be a future?

An end state - indeed an optimistic overall outcome - could be a future where PNG's 19 mini-grids are operating through IPP arrangements, delivering a reliable and affordable power supply to businesses and everyday Papua New Guineans to alleviate the effects of energy poverty.

Why does PNG have a power supply crisis?

As one former PPL employee noted in PNG's *The National*, the nation's "current power supply woes... can be attributed to lack of proper human resources development and supervision." "Most of the blackouts," they add, are "a result of lack of this specialised knowledge in power system management."

Why is png's electricity sector a problem?

These enterprises each have unique challenges, yet of highest concern is PNG's electricity sector, which requires desperate reform. Only 13 percent of PNG's population have access to electricity - one of the lowest rates in the Pacific.

Finally, another underacknowledged area of reform to PNG's power sector is the desperate need for human capital - simply having Papua New Guineans with the appropriate engineering and other ...
