Is energy storage regulated in Bangladesh?

For example, the Bangladesh Energy Regulatory Commission (BERC) Licensing Regulations 2006 do not include rules for licensing of energy storage technologies (except for pumped storage). The institutional framework for the procurement and deployment of such projects is well established in the country.

How much energy storage does Bangladesh need?

120GW of RE generation. If a similar ratio were to be considered for Bangladesh's short-term RE aspirations (~1GW in the next three years), the resulting energy storage requirements would amount to 250MW/500MWh of energy storage.

What can be done about grid connected energy storage in Bangladesh?

Limited experience and knowledge of grid connected energy storage in Bangladesh. Early-stage pilot programmes such as the planned 2MW grid connected BESS funded by the Asian Development Bank (ADB) would further support capacity building and knowledge transfer. 3.3.

Can distribution companies provide electricity solutions for displaced communities in Bangladesh?

There are no service obligations for distribution companies to provide electricity solutions for displaced communities in Bangladesh. Distribution companies and non-governmental organisations (NGOs) (in the absence of service area obligations) would be key institutional stakeholders for the deployment of this application.
