Is Barbados a leader in solar energy?
Continue reading -> Barbados continues to maintain a leadership position in solar energy within the Caribbean. Building on a successful Renewable Energy Rider program which has seen 9MW of distributed solar PV installed, the electricity market has finally opened up to independent power producers (IPPs) to develop utility scale solar projects.

Does Barbados use solar panels?
Solar panels are seen more and more frequently across Barbados. Similar to the ubiquitous solar water heater on Barbadian rooftops, the Government of Barbados is fully committed to the idea of renewable energy and solar PV, thereby preparing the country for even more substantial growth in this sector.

How many solar PV community solar gardens are there in Barbados?
Blue Circle Energy has over 40 solar PV Community Solar Gardens under development in Barbados, ranging in size from 250kW to 5MW. The project sites are distributed throughout the island, are located in each of Barbados' 11 parishes, and are sited and scaled to integrate with the community's natural and agricultural heritage.

How can Barbados improve its energy security & resilience?
The Ministry's objective is to improve Barbados' energy security and resilience, as well as reduce its dependence on imported fossil fuels, resulting in the retention of foreign exchange and the improvement of the country's economic competitiveness. Key activities include: Implementing Public Education and Public Awareness activities.

Explore our high-quality solar range, from panels to monitoring solutions. Chosen for efficiency and durability, our products help save energy costs for homes and businesses.

CloudSolar is structured as a community of solar farm owners who have invested in the development of renewable energy projects across roofs and land in Barbados.

This project is a critical component of the Barbados solar energy 2030 transition plan, which aims for a complete shift to renewable sources. The new 50MW installation significantly scales ...

Major facilities such as the Barbados project can have a tremendous impact on the planet by reducing the amount of polluting energy used and helping diversify the energy supply.

The European Union and Barbados have taken an important step towards a sustainable energy future with the launch of the Renewstable Barbados project which aims to integrate solar ...

In May 2014 the Barbados Light and Power Company (BL& P) invited proposals for an 8MW (AC) solar farm in St. Lucy. Approximately 40 companies bid on the project, mostly international ones and a few ...

In order to minimise the impact of this expense, the Government of Barbados (GoB) in the Barbados National Energy Policy (BNEP) 2019 - 2030 has outlined a plan for transitioning the country from a ...

The project sites are distributed throughout the island, are located in each of Barbados" 11 parishes, and include both solar PV and battery energy storage systems.
