Discover effective solutions to fix your SimpliSafe Base Station battery charging issues. Get your security system back up and running in no time!

With the new Base Station firmware update 2.10, we've introduced a new way to make sure your system is in good shape with Trouble Signals. Trouble Signals are a three-tone warning sound that will emit ...

Loud chirping in the SSCS3 base station typically signals low backup battery power. To replace, unplug the unit and open the battery compartment, usually located at the back or bottom.

To reset a SimpliSafe low battery warning, access the Base Station with a Phillips head screwdriver, replace NiMH rechargeable batteries, check for corrosion, ensure proper installation, ...

If your base station stops talking, rebooting the base stations will usually help fix the issue. To reboot your SimpliSafe base station, unplug it from the electric outlet and open the battery ...

If there is a technical issue with the batteries, or if the Base Station is having trouble keeping them charged, you may receive a Keypad warning or Base Station announcement to notify you of the ...

Why is my SimpliSafe base station not working? When a sensor is displayed as "Not Responding", it could either be a battery or connection issue. I would first replace the batteries in ...

If you have the app and unplug the brick, it should send a power lost text. Or if it's still working after 8 or more hours you should be fine. That's about how long it is supposed to be able to run on battery power.
