Berlin's legal requirement to install solar power on new and renovated buildings has helped drive a surge in rooftop photovoltaics, reports pv magazine.

From the 1st of January 2023, the Berlin Solar Ordinance mandates the installation of rooftop solar panels on all non-public construction projects in Berlin. In addition to new builds, existing buildings ...

With the amendment of the Berlin Climate Protection and Energy Transition Act (EWG Bln) in 2021, the installation of solar systems on the entire technically usable roof area is mandatory for new buildings.

The EO Solar application shows the solar roof potential and solar roof expansion in Germany at various administrative levels down to buildings. This illustration shows the potential for Berlin.

Here you can peruse detailed information on the long-term potential of solar energy use in Berlin. Discover also where existing solar-thermal and photovoltaic systems are located and how they are ...

Berlin's mandate for solar installations on new and renovated roofs has spurred rapid rooftop expansion, but the German capital remains far from its 2035 clean energy goal.

The east-west-roof was built before the opening of the new line, the bracket buildings and the north-south-roof were erected during running operations of the train station. On the east-west roof 780 ...

Yesterday, the city of Berlin announced that, starting from 1 January, private owners will be obligated to install solar roofs on newly constructed buildings. The law also applies to existing ...
