Today, the creators have launched several products on the market with different applications. These include small solar spheres designed to charge mobile devices or electric scooters, and a larger ...

This enables the Beta.ray to collect solar energy more efficiently than conventional solar panels with a flat surface that can only harvest energy from sunlight at particular angles. Even on an overcast day, ...

The spherical sun power generator prototype Rawlemon created is called the "beta.ray". This generator will combine spherical geometry principles with a dual axis sun tracking system. The glass sphere is ...

A German Company Rawlemon has created a spherical sun power generator prototype called the beta.ray. This technology combines spherical geometry principles with a dual axis tracking ...

Invented by solar energy engineers at Rawlemon, the betaray is a highly efficient and visually stunning way to harness light energy from the sun and moon for electricity or thermal applications.

A new spherical solar energy generating globe, "Betaray" has been developed by German architect Andre Broessel and solar energy architect colleagues at Rawlemon Studios in Barcelona, Spain.

The Betaray is designed to concentrate diffuse light and generate a powerful beam of solar energy. The Betaray can harness solar energy from the sun, the moon, or even the gray sky of a cloudy day, ...

Betaray is a spherical glass solar energy generator developed by German architect Andr#233; Broessel of Rawlemon Studios. Prototype uses a transparent ball lens and dual-axis tracking device ...
