The innovative and mobile solar container contains 196 PV modules with a maximum nominal power rating of 130kWp, and can be extended with suitable energy storage systems.

Hybrid solar container power systems are modular and containerized energy systems that combine solar photovoltaics, battery energy storage, and other power sources, such as diesel ...

BoxPower designs, installs, and operates containerized power systems. Learn more about our modular microgrid in a box solutions: the SolarContainer and MiniBox.

Our containerized energy solution offers notable economic and practical advantages:

Convert shipping containers into mobile power stations equipped with generators or solar panels. These can be deployed to remote areas or disaster-stricken regions to provide temporary power solutions. ...

Each solar-powered shipping container generator is transportable, securable, and can be fully customized to your specific needs, including hybrid and microgrid compatibility.

SolaraBox Mobile Solar Container brings green energy wherever you need it. The integrated solar system delivers 400-670 kWh of energy daily. Thanks to foldable solar arrays, the container is ...

A complete hybrid system that provides clean, affordable and reliable energy anywhere
