CLP's business spans every major segment of the energy value chain, including retail, transmission, distribution and a diversified portfolio of electricity generation assets.

The scheme has been well received since its launch. CLP is developing a Smart Grid to connect more renewable energy generation systems, while ensuring a safe, reliable power supply that is less ...

CLP believes that solar energy is the main renewable energy source for low-carbon power generation, and we value the value of including solar energy in low-carbon portfolios.

We use coal to generate electricity at Castle Peak Power Station. Since 2011, we have significantly reduced emissions from our power station. Our Emissions Control Project reduces emissions such ...

CLP uses grassland and pond surfaces for the installation of 163,072 monocrystalline-N-type-bifacial solar panels with a total installed capacity of 90MW. It is equipped with a 9MW/18MWh ...

Our joint venture Apraava Energy is focused on clean energy, power transmission and other customer-focused energy businesses. CLP has built a number of assets in Taiwan Region and Thailand. We ...

As of end-2022, CLP's China power generation portfolio is fairly balanced between its wind and solar, nuclear, and coal-fired assets in terms of effective installed capacity.

LP's renewable energy projects in the Mainland are progressing steadily. Groundbreaking ceremonies were held late last year and at the beginning of this year for Juancheng ...
