What is a solar panel subcontractor?

A solar panel subcontractor is a contractor hired to install solar panels as part of a larger project. They are typically assigned to place the panels on the roof or other specified locations by the main contractor.

Should you hire a solar specialist or a subcontractor?

When it comes to solar installation, you can minimize risks by choosing a solar specialist. However, if you decide to work with a subcontractor, make sure to ask for receipts to ensure that the job is being completed and that you have a means to make payments.

Are new buildings required to use solar photovoltaic (PV) technologies?

(PNA) MANILA - New and existing buildings are now required to use solar photovoltaic (PV) and other renewable energy (RE) technologies with the Department of Energy's (DOE) issuance of a policy on the adoption of the guidelines on the energy-conserving design of buildings.

What are solar photovoltaic panels?

Solar photovoltaic panels are electric panels that absorb the sun's energy and convert it to usable AC energy in your home. LG is a brand you may already be familiar with. They are a South Korean multinational manufacturer that makes solar photovoltaic panels, among other products such as televisions, mobile devices, tablets, and smartwatches.
