The ACT Government is future-proofing Canberra's energy supply by expanding its renewable energy storage with a new partnership with global specialist energy storage business, Eku Energy, launched ...

The project will deliver an ecosystem of batteries across the ACT to ensure its electricity grid remains stable, and will help to future-proof the state's electricity security.

The way has been cleared for construction to begin on a 250 MW / 500 MWh battery energy storage system that will help "future proof" the Australian Capital Territory's energy supply by ...

The project will support 150 local jobs in the emerging clean energy sector. Battery storage technology is a key component of the ACT's net-zero emissions future.

The large-scale battery storage system will deliver 250 megawatts (MW) of power, store renewable energy and support grid reliability. Enough energy to power one-third of Canberra for two ...

"Wind and solar generate clean electricity, and large-scale batteries allow us to store that energy and support the grid," Minister Orr said. "Through the Big Canberra Battery project, the ACT ...

"With support from the Australian Government, neighbourhood batteries let communities store sunshine for later. They boost local solar, ease pressure on the grid and help deliver cleaner, ...

As heatwaves bake grids and storms knock out power lines, the Canberra reservoir serves as an energy insurance policy. During 2024's "Black Summer 2.0" bushfires, early-stage storage capacity helped ...
