This study analyses renewable energy resources, infrastructure, and practical options to accelerate the energy transition and unlock Chile's potential as an exporter of renewable energy and ...

Plans to invest \$USD 2 billion in large-scale energy storage by 2026 in the northern Atacama desert, in addition to 5.4 GWh of storage already in the procurement pipeline for 2027-2028. Projects with ...

Chile 2050 Energy Transition Roadmap - Analysis and key findings. A report by the International Energy Agency.

Chile's energy transition is reshaping its mining sector, renewable energy mix, and climate strategy, with lithium and copper production at the centre of global supply chains.

Given Chile's decarbonization goals and projected growth in electricity demand, designing effective policies to support the expansion of renewable energy remains a central challenge in the years ahead.

The primary objective of the analysis presented in this section was to preliminarily assess the risk of compromising reliable and uninterrupted energy supply in the transition of the Chilean Electricity grid ...

The Ministry of Energy contributes sectorially to public policies such as the H2V action plan, the decarbonisation plan, the electromobility roundtable, the sectorial plan for mitigation and adaptation ...

This report has been driven by the Enel Group in Chile and prepared by energiE in collaboration with MRC, as an analytical and participative consideration on the steps and the path Chile must follow to ...
