S&#227;o Tom&#233; and Principe's third NDC demonstrates overall progression and enhancement compared to the previous NDC. S&#227;o Tom&#233; and Principe commits to a conditional greenhouse gas reduction target ...

This page offers a comprehensive overview of Sao Tome and Principe's climate zones of temperature and precipitation with reflection of their climatological seasonal cycle, drawing on the K&#246;ppen-Geiger ...

Sao Tome and Principe's latest total emissions are 0.32 megatonnes of CO2-equivalents, a negligible share of the global total. While small in absolute terms, this footprint reflects contributions ...

Climate change has become a critical issue for many nations, especially small island states like S&#227;o Tom&#233; and Pr&#237;ncipe. The country faces significant risks from rising sea levels, ...

Therefore, the objective of this work is to assess the future climate change in Sao Tome and Principe islands at higher spatial resolution, under RCP4.5 and RCP8.5 scenarios.

Worse, even though Sao Tome and Principe produces only a tiny portion of greenhouse gases, it suffers the most from the effects of climate change, including sea level rise, coastal erosion...

By focusing on institutional capacity building, community engagement, and infrastructure development, the program offers tangible solutions to tackle the pressing challenges posed by a ...

In S&#227;o Tom&#233; and Pr&#237;ncipe, a small island developing state in the Gulf of Guinea, the impacts of ocean acidification are particularly pronounced due to the country's heavy reliance on ...
