Huawei's base stations, such as the DBS5900 and DBS3900, are advanced wireless access devices designed to support various network technologies, including 4G LTE and 5G NR.

The IBBS200D and IBBS200T are applicable to outdoor scenarios, and are compact and easy to transport. The IBBS200D works in direct-ventilation mode for heat dissipation.

Discover the HJ-SG-R01 series mobile outdoor base stations with intelligent energy management for reliable and flexible communication.

Discover Huawei base station types, mechanical properties, and best practices for optimal deployment. Explore specifications, performance insights, and real-world applications to ...

ICT needs a ubiquitous, reliable connection to empower industry digitalization. For governments and industries such as transportation and energy, our enterprise wireless provides purpose-built mobile ...

The DBS5900 can meet the needs of industry users for wireless broadband access and multimedia critical communication, and obtain better coverage and user experience. The DBS5900 adopts a ...

Huawei 5G remote radio solution is a high-power and ultra-wideband telecom equipment which provides a seamless 5G network among multi-devices. The highly integrated design reduces power ...

Power your network with the Huawei RRU3959. This 1800mhz outdoor blade-type AC/DC radio transceiver offers high-performance 5G wireless infrastructure.
