Heliogen Inc., a leading provider of concentrating solar energy technology, today announced the conclusion of Capella, a first-of-a-kind ...

Recognizing the crucial role heliostats play at large-scale concentrating solar power facilities, the U.S. Department of Energy's Heliostat Consortium awarded a combined \$3 million across six projects to ...

Stay up-to-date with the latest concentrated solar power csp news: global industry trends, product releases, regulatory updates & more.

CSP technology, known for its ability to thermally store solar energy for power generation during peak demand periods, is becoming increasingly essential in the global ...

At NREL, his work has focused on a range of issues in concentrating solar technologies, from systems analysis to reducing water use at concentrating solar power plants in desert ...

NLR's solar energy research leverages our expertise--from materials to systems to commercialization--to continually improve the affordability, performance, and reliability of this ...

Molten-salt power tower plants have been built in Chile (e.g., the Cerro Dominador molten-salt power tower plant was synchronized with the grid in 2021 (Roca, 2021)) and in Dubai, United Arab Emirates ...

Solar energy can be used to convert basic chemical feedstocks and water into fuels that offer grid stability, energy security, and environmental benefits. NLR researchers are working to ...
