What is a containerized mobile substation?

Containerized mobile substations are sheltered and address applications in challenging environmental conditions including areas of high pollution, and humidity. Customers requiring shorter overall delivery times and minimal on-site work have been the main drivers for Hitachi Energy's development of pre-fabricated indoor substations.

What is a type 6 generator container?

Our Type 6 generator containers consist of two or three pre-assembled modules, depending on the engine type and the application. The overall package (gas engine, container, and auxiliary components) is available for 65, 70, 75 and 80 dB (A) in 10m (surface sound pressure level according to DIN 45635).

Which genset containers are available?

All genset containers are also available with an option for -40°C and most variants can be upgraded for +45°C. A broad range of options, both mechanical and electrical, are available to ensure that our containers meet the project requirements. For example, we offer several heat recovery configurations and exhaust after treatment systems.

What is a 420 kV grid substation?

Fast deployable, independent grid substations up to 420 kV for Transmission System Operators are increasing the availability of energy transmission systems. The substation is designed for road transportation and dimensions of each unit meet local road transportation requirements.

SMA Solar Technology announces the commercialization in Europe of its new MVPS-9200 medium voltage station in a 12-meter containerized version for battery energy storage systems ...

Jenbacher offers containerized generator sets based on our Type 2, 3, 4, and 6 gas engines. Leveraging the expertise acquired during several decades with more than 3,000 containerized units delivered, ...

Factory-tested units can be installed and put into operation within days Competent support from global service network spanning 100 countries Proven, state-of-the-art equipment Single-source ...

The containerized design ensures protection against environmental factors while maintaining optimal operating conditions for the equipment. These units feature automatic voltage regulation, ...

Siemens Energy prefabricated power solutions are customized, prefabricated high-voltage substations that help save time and money both in temporary and permanent applications.

Multi-modular E-Houses solution for electrical balance of plant of gas turbine power plants E-houses substations are equipped with medium- and low-voltage equipment, AC-UPS and ...

If you have troubles with the operation of the power plant, you can find a reliable answer from USP& E, which has years of experience in diesel power plants, technical support involving ...

Shenheng Power Equipment CO., LTD is a company specializing in the production of high and low voltage switch power transmission and distribution equipment and high, low voltage ...
