The International Renewable Energy Agency predicts that with current national policies, targets and energy plans, global renewable energy shares are expected to reach 36% and 3400 GWh of ...

Cuba is investing in solar energy and battery storage to address its severe energy crisis, reduce dependency on fossil fuels, and improve the reliability and stability of its power supply.

According to information provided by the Cuban newspaper Granma, only four of the projects that will be operational this year have a 50-MW battery storage system.

On Tuesday, Cuban authorities announced that the administration of President Miguel Diaz-Canel has devised a strategy to increase energy supply through the use of renewable energy, ...

By 2025, 200 MW of battery systems will be installed to store solar energy, key to stabilizing the grid. Containers are already in Cuba, awaiting assembly.

Now, it will host five of the solar parks to be built on the island. The region has an industrial port, a thermal power plant, and a refinery, making it a key area for the country's energy ...

Cuba on Friday unveiled a new solar energy park in the capital Havana, part of an ambitious project to alleviate the communist island's increasingly desperate struggle with power...

The plan anticipates one thousand megawatts of solar energy by 2025, but without installed batteries, which prevents meeting nighttime demand and limits the impact in the face of ...
