---

The solar photovoltaic market size crossed USD 323.5 billion in 2025 and is expected to grow at a CAGR of 8.1% from 2026 to 2035, driven by integration of solar PV across agriculture and business ...

In the photovoltaics market, factors such as growth in the adoption of PV systems for residential applications, decreasing costs of PV systems, and advancements in energy storage devices are ...

Each quarter, the National Renewable Energy Laboratory conducts the Quarterly Solar Industry Update, a presentation of technical trends within the solar industry.

Growing demand for renewables-based clean electricity coupled with government policies, tax rebates, and incentives to install solar panels is expected to drive the growth of solar PV panels industry in ...

China continued to dominate the global market, representing ~60% of 2024 installs, up 52% y/y. The rest of the world was up 11% y/y. The IEA reported Pakistan's rapid rise to fourth place ...

After several years of 30 percent annual growth in installations, 2024 saw a decline: fewer panels were installed in many markets, and companies' valuations declined. This led to large capital ...

The current trajectory of the Solar PV panels market reflects structural transformation driven by rapid deployment, supply-chain dynamics, and competitive pressures that transcend ...

The Solar PV market in the U.S. is projected to grow significantly, reaching an estimated value of USD 331.25 billion by 2032, driven by the need to combat climate change through ...
