The Global Power Plant Database is a comprehensive, open source database of power plants around the world. It centralizes power plant data to make it easier to navigate, compare, and draw insights ...

Wind speed and generation estimates are provided at almost all wind plants in the contiguous United States for the years 2018-2021. The data in PLUSWIND is contained in a simple table format (.csv ...

Primary energy is based on the substitution method and measured in terawatt-hours. Data source: Energy Institute - Statistical Review of World Energy (2025) - Learn more about this ...

Spanning 20 years and ideal for assessing wind power and meteorological variables at heights relevant for wind turbines, the data are accessible via download, API, and visualization tools.

Develop a national database of hourly and 5-min plant-level power time series starting with year 2018 using different wind speed data sources, in addition to a static database that includes wind power ...

This data repository contains hourly wind speed and generation estimates for existing wind plants located within the contiguous U.S.

The Wind Power is a comprehensive database of detailed raw statistics on the rapidly growing sphere of wind energy and its supporting markets.

Danish Energy Agency (DEA) provides data contributing to generate an overview of the Danish energy supply system, including wind power. The Master Data Register of Wind Turbines is a national ...
