Will Fiji enter a new era of digital connectivity?

Fiji is set to enter a new era of digital connectivity, with the Ministry of Trade, Co-operatives, Micro, Small and Medium Enterprises and Communications officially issuing 5G spectrum licences to the country's three major telecommunications operators - Digicel Fiji, Vodafone Fiji, and Telecom Fiji.

Is Vodafone Fiji ready for 5G?

Vodafone Fiji is gearing up for the first phase of its rollout and has already completed extensive testing. CEO Elenoa Biukoto said the technology promises substantial gains for key sectors such as healthcare, agriculture, finance, and tourism. "We're excited to collaborate with government and the Telecommunications Authority to bring 5G to life.

Why did Digicel invest in 5G in Fiji?

Each of the operators welcomed the development, highlighting its significance in reshaping Fiji's connectivity and economic landscape. Digicel Fiji CEO Farid Mohammed said the company's substantial investment in 5G aligns with the government's clear vision for a connected digital future.

What does Fiji's New spectrum allocation mean for Telecom Fiji?

Telecom Fiji CEO Charles Goundar described the move as a "landmark decision" that will vastly improve connectivity and expand access to digital services. "The timely allocation of spectrum empowers us to drive innovation and reduce the digital divide. This is a game-changer for all Fijians," he said.

Vodafone Fiji and Digicel Fiji have both launched 5G services in the country. Both carriers were awarded their 5G licenses last week by Fiji's government, along with Telecom Fiji. ...
