This new, large-scale solar database contains all ground-mounted commercial U.S. solar photovoltaic facilities with capacities of one megawatt or greater.

Project Sunroof is a solar calculator from Google that helps you map your roof's solar savings potential. Learn more, get an estimate and connect with providers.

This map contains multiple layers showcasing solar infrastructure within the US. The map visualizes solar power plants, electric power transmission lines, and the photovoltaic (PV) ...

This set of maps is optimized for on-screen presentations (e.g. PowerPoint, Web, etc.) and for letter page printing (A4 format or similar). The maps are provided in the loss-less PNG format, with the ...

Solar Energy Technologies Office U.S. Domestic Solar Photovoltaic Manufacturing Map Data

The USPVDB Viewer lets you discover, visualize, and interact with the USPVDB through a dynamic web mapping application.

With this map, you can filter by product type and facility status, as well as create a drive-time radius from any map point to explore geographic distances to potential customers or suppliers.
