As almost the whole territory of Timor-Leste has the potential to successfully generate solar energy, the Government is keen to tap into this potential to setup utility scale solar plants as well ...

The Australian Government has today announced seven new business partnerships to support small-scale, off-grid renewable energy in remote and rural areas across the Pacific and Timor-Leste.

These partnerships provide co-funding of up to AU\$1 million to organisations developing innovative renewable energy solutions that increase access to affordable, reliable, off-grid electricity.

The small Southeast Asian nation of East Timor is at an energy development crossroads. The country has made international and domestic pledges to reduce its carbon footprint through untapped solar ...

Technicians in Timor-Leste have experience in small-scale, off-grid solar energy systems. Commercial or industrial scale installations are more complex and appropriate technical capacity is scarce.

With a largely rural population living in sparsely populated, remote locations, solar home systems (SHS) will play an important role in meeting the off-grid component of rural electrification in East Timor.

Increasing climate variability will make irrigation systems and water management critical to Timor-Leste's food production systems. Electricity will be important in powering these systems, as ...

"In Timor-Leste, most people live in rural areas and rely on diesel for electricity, with access often cut-off due to natural disasters, low infrastructure quality and material aging. We have ...
