Solar Team Eindhoven has unveiled plans for an on and off-road car powered entirely by the sun. Every two years, the student team from Eindhoven University of Technology builds a solar-powered car.

In the current study we report design and testing of a light-weight electric/solar four-wheel drive cart capable of running at speeds in the order of 30mile/hour.

Installing solar energy systems on electric four-wheelers can significantly enhance their efficiency and sustainability. 1. Evaluate your energy needs, 2. Select appropriate solar panels, 3. ...

One of the possible solutions is solar-powered electric vehicle (SPEV); the solar-powered EV can self-charge its batteries without any turbulence caused to the environment. This paper ...

A roadmap for the sustainable integration of solar EVs into energy systems is presented, offering insights into the future of energy-efficient and decarbonized transportation.

A prototype has been developed using four DC motors mounted on a four-wheeled chassis. The front wheels are powered by two batteries to move the vehicle, while the rear wheels, ...

A solar powered charging four-wheeled electric bicycle device includes: a solar panel group installed on the top of the four-wheeled electric bicycle. The output power is input...

"Under this MoU, LG Energy Solution will exclusively supply 2170 cylindrical battery cells from 2025 to 2031 to power Aptera's solar EV, the "Aptera", aimed to launch in the U.S. market in...
