For sustainable energy planning, it is also important to examine any shortcomings and/or gaps that may exist in Lao PDR's energy system. The list below summarises these weaknesses.

By implementing energy efficiency measures and transitioning to a diversified electricity supply, Lao P.D.R. can reduce overall energy costs by approximately 25 %, enhance energy ...

By adopting renewable energy sources, improving energy efficiency, and transitioning to cleaner fuels, Lao PDR aims to decrease emissions across various sectors. To assess the feasibility ...

In Lao PDR, there are multiple public and private sector stakeholders involved in development and implementation of energy efficiency (EE). Of which, MEM is the main agency responsible for energy ...

The country's National Strategy on Climate Change sets a goal to achieve low-carbon economic growth; specifically, within the energy sector, where the policy calls for the implementation of more energy ...

We envision harnessing the transformative potential of green hydrogen-ammonia to drive a resilient, just and sustainable Lao PDR energy transition.

The energy sector plays a crucial role in Laos' climate strategy, as the study explores pathways to reduce emissions through renewable energy and low-carbon technologies.

As the Southeast Asian nation balances economic growth with environmental sustainability, this strategic blueprint outlines actionable pathways for reducing carbon footprints, ...
