To mitigate the impact of intermittent wind and solar power generation, the Electricity Generating Authority of Thailand (EGAT) plans to invest 90 billion Thai baht (approximately 2.6 ...

The Electricity Generating Authority of Thailand (Egat) plans to convert three hydropower dams into massive energy storage systems with a 90-billion-baht investment. This effort aims to ...

Enter Thailand pumped storage power stations --the superheroes of energy storage. These systems act like giant water batteries, pumping water uphill during off-peak hours and ...

Thailand intends to source nearly 35,000 MW of new electricity from renewables as it looks to reach carbon neutrality and net zero commitments. However, the deployment of Battery ...

This project aims to serve as an energy storage system to ensure the security of the country's power system and support the transition toward rising renewable energy in the future.

The Electricity Generating Authority of Thailand is currently focusing on expanding its pumped-storage capacity to increase system flexibility and to allow for a significant ramping-up of variable renewable ...

Energy storage is in its infancy in Thailand, and new business models are already emerging. As the regulatory framework adapts to accommodate new players in the market, we ...

Electricity Generating Authority of Thailand (EGAT) plans to build three pumped storage power plants (PSPPs) with the use of existing dams. One of these dams is located in the ...
