Singapore has targeted 200MW of energy storage beyond 2025 and 2GW of solar by 2030, but will continue to rely on natural gas for the next 50 years, according to a government official.

French energy giant TotalEnergies has started construction on a solar-plus-storage project in South Africa, with a power generation capacity of 216MW and a battery output of 75MW/500MWh.

The project, the main objective of which is to provide greater storage capacity for imported diesel fuel, fuel oil, jet fuel and gasoline, consists of the following components: a) Extension of Port Neves ...

Explore how the Sao Tome and Principe Substation Energy Storage Project addresses energy instability while boosting renewable integration. Discover cutting-edge solutions for island nations" unique ...

This is the most comprehensive and updated report on the status of renewable energy and energy efficiency in S& #227;o Tom& #233; and Pr& #237;ncipe, allowing an overview of current and future ...

Today, we had the pleasure of presenting S& #227;o Tom& #233; and Pr& #237;ncipe's National Sustainable Energy Investment Plan (NSEIP) -- developed together with the Government as the final milestone of the ...

With 95% of energy imports costing \$28 million annually [3], the twin-island nation desperately needs sustainable solutions. But here"s the kicker - their solar potential could generate 5.2 kWh/m& #178;/day [5], ...

The government of Sao Tome and Principe plans to reduce the twin-island nation"s reliance on expensive oil imports by contracting a UK-based private company to deploy a 1.5-MW floating Ocean ...
