---

Estonia has seen a significant increase in its solar power capacity in 2022, becoming one of the leaders in solar power per capita among EU members. With growing investments and innovative startups, it ...

Estonia's solar sector is at a pivotal moment, experiencing a surge in growth fueled by significant new financing opportunities and, simultaneously, coming under closer regulatory scrutiny.

Despite these challenges, Estonia has strong potential to become a regional leader in renewable energy, driven by the combination of solar, wind, and battery storage.

Estonian power plants produced 3,398 gigawatt-hours of electricity from renewable sources in 2024, which accounted for 63 percent of Estonia's electricity production, and for the first ...

Wresearch actively monitors the Estonia Solar Market and publishes its comprehensive annual report, highlighting emerging trends, growth drivers, revenue analysis, and forecast outlook.

While solar parks were previously developed with the goal of selling electricity to the grid, the focus has now shifted to storage capacity and on-site energy consumption.

The European Investment Bank (EIB), together with local commercial banks SEB and Luminor, is lending the Estonian renewable energy company Sunly EUR62 million to build and operate a ...

Renewable energy consumption in Estonia is steadily increasing, surpassing the EU average. By 2023, 41% of energy production came from renewable sources. Estonia's renewable ...
