This graphic, using exclusive data from Benchmark Mineral Intelligence, compares battery capacity by cathode type across major countries.

Almost the entire global production of battery components took place in East Asia, with China being the main supplier and South Korea and Japan contributing an additional 20 percent.

Explore hidden regional trends and supply-demand imbalances in the global battery supply chain, with strategies to drive market growth.

Use dynamic filters to sort by region, battery chemistry (LFP, NMC, solid-state), ownership and launch year, including CAM and pCAM projects. Whether you're an analyst, investor, ...

Asia Pacific electric vehicle battery market led the global market with a revenue share of 51.8% in 2024. The China electric vehicle battery market is the global leader in EV battery production and demand. ...

Understanding the battery manufacturing landscape is crucial for investors, businesses, and policymakers looking to navigate this fast-changing industry. Below, we explore the latest market ...

Asia-Pacific: The Manufacturing Powerhouse China's substantial EV production and battery infrastructure pushed its demand to around 415 GWh in 2023, far outpacing Europe's 185 GWh and ...

In 2025, "battery leadership" is best understood as a combination of where cell capacity is located, who owns the manufacturing footprint, and how reliably plants can ramp to competitive ...
