How many MW of energy storage does Georgia Power need?

Georgia Power is seeking 500 MW of energy storage that can discharge for at least two hours. The energy storage can be standalone, or with a new or existing renewable resource. Ascend Analytics is administering the request for proposal (RFP) on behalf of Georgia Power.

Will Georgia Power add storage to solar projects?

In its IRP, Georgia Power detailed adding storage to solar projects, saying that its adoption of solar+storage versus solar-only generation at sites is currently at 17%. Georgia Power first examined energy storage in its 2019 IRP, with approval to build, own and operate 80 MW of BESS at the time.

Where are Georgia Power's new battery energy storage systems located?

Georgia Power announced today that construction is underway on 765-megawatts (MW) of new battery energy storage systems (BESS) strategically located across Georgia in Bibb, Lowndes, Floyd and Cherokee counties.

Does Georgia Power support Customer-Sited solar?

Georgia Power is also committed to supporting customer-sited generation resources to meet the state's growing energy needs. The 2025 IRP includes two customer expansions of BESS programs including enhancements to the Customer Connected Solar Program and launching a new Customer-Sited Solar Plus Storage Pilot.

We work closely with Georgia's universities to identify cutting-edge research regarding energy storage and provide companies with access to the latest applied research.

This article explores the latest developments, key players, and opportunities in Georgia's solar-plus-storage sector--a critical read for businesses and investors eyeing the clean energy transition.

Georgia Power announced today that construction is underway on 765-megawatts (MW) of new battery energy storage systems (BESS) strategically located across Georgia in Bibb, ...

Georgia Power is seeking 500 MW of energy storage that can discharge for at least two hours. The energy storage can be standalone, or with a new or existing renewable resource.

GA Solar supports the distributed solar & storage industry and its customers across the state of Georgia. Our work benefits Georgia businesses, workers, residents, and ratepayers.

In a decisive move to bolster its clean energy capabilities, Georgia Power has announced a request for proposals (RFP) to procure 500 MW of energy storage, with a minimum capacity of 500 ...

Georgia's solar and storage market has taken off in recent years, landing it a top spot in SEIA's national solar rankings. During the 2024 session, an industry-supported decommissioning bill was passed ...

For investors, the utility's strategic investments in solar, battery storage, and transmission infrastructure offer a compelling case for capitalizing on the renewable energy boom while mitigating ...
