Utility regulators on Tuesday approved Georgia Power's 2025 integrated resource plan, which calls for keeping coal plants online to serve anticipated data center demand. It also includes ...

In Georgia, while energy demand growth doesn't exactly correlate with an increase in gross domestic output (GDP), the state is expecting both.

Georgia Power filed an update to its Integrated Resource Plan (IRP) to request additional generation resources in the face of mounting projected energy needs for the state.

By shifting and reducing demand during peak periods, demand response alleviates stress on the grid, lowers the risk of blackouts during extreme weather events, and improves overall energy security.

The Georgia Public Service Commission (PSC) today approved Georgia Power's 2025 Integrated Resource Plan (IRP). The final, approved plan will allow the company to continue to meet ...

In addition to investments in its transmission and generation systems and assets, Georgia Power recognizes how important demand-side resources, such as energy efficiency programs and ...

Read the latest Integrated Resource Plan filings to see how Georgia Power is planning to meet Georgia's growing energy needs responsibly.

Customer-focused initiatives include solar-plus-storage programs, distributed energy resource demand response, and increased funding for energy efficiency efforts targeting lower-income...
