The integrated ORing MOSFET in our PROtop AC/DC and DC/DC converters ensures that any internal short circuits are reliably decoupled and eliminates the need for additional diode modules.

The GENH family of programmable power supplies sets a new standard for flexible, reliable, AC/DC power systems in OEM, industrial and laboratory applications. Highest power density available: ...

Depending on the version, the power source can be installed in a control cabinet, a 19-inch housing or left open-frame (without housing), so that the power source can be easily integrated into your system.

Smart control and diagnostics of the power supply as well as communication with your CAN, CANOpen or EtherCAT bus system. We build first prototypes, test them and provide them to you. The ...

BENNING has been supplying battery-based AC and DC power supplies to various mobile and fixed network operators worldwide for decades and has invested heavily in the development of highly ...

Our DIN-Rail power supply solutions are designed for long-term 24/7 continuous operation in the industrial temperature range for use in IIoT/Industry 4.0, embedded IPC, automation, measurement ...

They feature power supply, distribution, and protection equipment as well as radio systems and passive or active cooling. Contact us today to learn about all the options and to find a solution that is right for ...

Delivering tailor-made power supply systems that meet your individual requirements is both our goal and our driving force. We support you from the initial concept and development of a test setup all the way ...
