Quotes are sought for four customized hydroponic shipping container farm suites, each capable of supporting up to 8,000 plants, to be installed at the USDA-ARS Vegetable Research Unit ...

Contract Opportunities Contract opportunities are procurement notices from federal contracting offices. Anyone interested in doing business with the government can use this system to ...

The program provides guaranteed loan financing and grant funding to agricultural producers and rural small businesses for renewable energy systems or to make energy efficiency improvements.

To be eligible to compete for government contracts, it is necessary for the solar contractor to obtain a data universal numbering system (DUNS) and then register with SAM.

These resources provide information and best practices for federal facilities interested in procuring on-site solar photovoltaic (PV) systems.

Our proven HELIOS Solarator(TM) products are mobile, containerized renewable energy stations trusted by major corporations and government bodies on remote, regional, and urban sites.

This table showcases the diverse range of farm equipment that can be powered by solar energy, demonstrating the potential for increased sustainability and efficiency in modern agriculture.

Further technical improvements, cost reductions, and securing government incentives can facilitate the real-world deployment of these sustainable machines.
