How much does a data center rack cost?

Illustrative Annual Cost to Power One Data Center Rack (by Density, PUE, & Electricity Rate) This table shows how rack density, PUE, and location dramatically impact annual costs. An AI-capable 60 kW rack in a high-cost state could exceed \$200,000 annually, underscoring the financial implications of high-density infrastructure.

How much power does a data center use?

Efficient data centers with a lower Power Use Effectiveness (PUE) ratio can reduce power costs and data center pricing. In colocation environments, the average power draw percentages typically hover around 60%. The standard wattage range for a rack is between 2-3 kW, with the maximum capacity for 5 racks reaching about 25 kW.

How much does a Data Center setup cost?

Small data center setup (10-20 racks): \$50,000 to \$100,000. Medium data center setup (50-100 racks): \$200,000 to \$500,000. Large enterprise data center setup (200+ racks): \$1,000,000+. Digital Infotech Solutions offers tailored rack and stack services to enterprises in the U.S.

How much does server colocation cost?

Single server colocation is popular for businesses seeking secure server hosting in a data center environment. Server colocation typically costs between \$79 and \$599 per month, depending on the provider and colocation cost requirements. Full rack deployment costs may include charges for space, power requirements, and bandwidth usage.
