In keeping with the Guyana Government's commitment to bridge the energy divide across the country, several communities across Region Nine (Upper Takutu-Upper Essequibo) will ...

The first, with a capacity of 0.65 MW, was commissioned in the town of Mahdia in central Guyana last year. It was followed by a 0.75 MW farm commissioned in July. Guyana has also ...

Microgrids have been identified as a key component of the Smart Grid for improving power reliability and quality, increasing system energy efficiency, and providing the possibility of grid-independence to ...

"Today, we are handing over solar systems that are linked directly to renewable energy. Energy is important for development and for the economic growth of Guyana. It is also important for ...

Guyana has commissioned a 0.6 MW grid-forming solar farm in Leguan, an island in the delta of the Essequibo River on the country's northern coast. The installation, valued at GYD 292.1 ...

The microgrid includes conventional generation (diesel-fueled reciprocating engine generators) as well as solar PV (multiple distributed arrays ranging from 50 kW to 260 kW).

The solar installation includes an 81 kW microgrid, a 24.2 kW solar system, and 51 solar home systems, each boasting a 2.2 kW capacity. Valued at approximately \$1.4 million (GYD 300 ...

Investments include solar micro-grids for disconnected areas, grid-tied installations and hybrid projects. The government of Guyana has approved more solar energy project development ...
