The Senate plans to start cutting the solar and wind energy subsidies established under the 2022 Inflation Reduction Act in 2026, according to language released by the committee chair, ...

Discover how government subsidies for renewable energy, including solar and wind, are reshaping the energy landscape post 2022, reducing costs and shifting away from fossil fuels.

Public utility subsidies for buying or installing clean energy property are subtracted from qualified expenses. This is true whether the subsidy comes directly to you or to a contractor on your behalf.

The Inflation Reduction Act has extended the 30% solar tax credit to 2032. Here's what that means and how to take advantage of it.

The recent overhaul of subsidies under the Trump Administration has significantly altered the landscape for renewable energy investment in the United States. By abruptly terminating the ...

Without federal solar tax incentives, the financial landscape for residential solar systems changes dramatically. Currently, the federal tax credit reduces the total cost of solar installations by 30%, ...

On July 4, 2025, President Trump signed the One Big Beautiful Bill Act (OBBBA) into law, marking a significant turn in US clean energy policy. The new law dismantles or narrows many ...

As 2026 approaches, the landscape of federal incentives for solar energy is shifting dramatically. The 2022 Inflation Reduction Act (IRA) had promised generous, decade-long tax credits ...
