Can heavy-cargo drones transport sealed cargo containers from indoors-to-indoors?

Transporting sealed cargo containers from indoors-to-indoors is our specialty. Combined with our cooling capability and advanced cold-chain data tracking solution, you can now utilize heavy-cargo drones for automated and easy cold-chain logistics. Indoors-to-indoors data visibility, 100% automation, 100% punctuality.

What is a drone port?

Drone ports may help enable a range of autonomous and BVLOS (beyond visual line of sight) missions, such as ISR (intelligence, surveillance and reconnaissance), mapping, industrial inspection, and package delivery. UAV docking stations may include the facility to download flight logs and data from the drone's sensors and payloads.

What are drone enclosures used for?

These enclosures may also be used to store packages for delivery drone services. Drone stations help mitigate the low flight endurance and long recharge times of battery-powered UAVs by automating the recharge process, which means that a human pilot is not required.

What is a box for a drone?

The box is made of cardboard and can be reused. The box is covered with a layer of thin film, and can sustain for a period of time in the air when it rains. Ideal for mechanical loading to the drone. Support parachute module.

Drone Ports & Landing Pads Automated Drone Stations Stabilized Landing Platforms Drone ports may be mobile or fixed in place, and may also be installed on naval vessels and moving vehicles. Stations that have to contend with a constantly moving platform may include a self-leveling landing pad that ensures that the drone will always land on a stable surface. Drone landing pads may utilize a variety of technologies to ensure that...
