How many solar panels do I need? Use our 2025 calculator to size your system by home size, kWh usage, and location. Get panel count, roof space, and kW--free from SolarTech.

We estimate a typical home needs between 16 and 23 solar panels to cover 100% of its electricity usage.

Wondering how many solar panels you need? Learn how to calculate panel needs, understand peak sun hours, and see real examples to size your solar system right.

When sizing a solar system, follow these steps to find out exactly what will cover your energy needs. If you'd just like a quick estimate without having to work through the math, feel free to use our solar ...

Discover how to determine the right size solar panel for your needs, including key factors, benefits, and common challenges.

Step 1: Determine Your Average Monthly Kwh Usage  
Step 2: Calculate Your Daily Kwh Usage  
Step 3: Estimate The Amount of Sunlight Your Solar Panels Will Receive  
Step 4: Account For Inefficiencies  
Step 5: Full Or Partial Offset?  
Step 6: Determine How Many Solar Panels You Need  
Most grid-tie homeowners choose to offset 100% of their energy needs with solar. But it is also possible to start with a smaller system for partial offset, and then expand down the line as the budget allows for it. If partial offset is your goal, you can account for that here. For example, let's say you want to start by offsetting half your energy ...
