Will Penghui energy build a 20GWh energy storage battery project?

On the same day, Penghui Energy disclosed that in order to further improve the company's production capacity layout and enhance the influence and comprehensive competitiveness of the company's energy storage business, it plans to build a 20GWh energy storage battery project in the Zhizao New City of Quzhou City, Zhejiang Province.

What will Penghui Energy Invest in?

The funds raised by Penghui Energy will be mainly used to expand production capacity. Among them, 2.4 billion yuan will be invested in the first and second phase projects of energy storage batteries with an annual output of 10GWh.

How much yuan will be invested in Penghui smart energy storage?

Another 800 million yuan is planned to be invested in the Penghui smart energy storage and power battery manufacturing base project. The project is implemented by Liuzhou Penghui Energy Technology Co., Ltd., a wholly-owned subsidiary of the company, with a total investment of 1.2 billion yuan and a construction period of 15 months.

Who is Liuzhou Penghui energy technology company?

The project is implemented by Liuzhou Penghui Energy Technology Co., Ltd., a wholly-owned subsidiary of the company, with a total investment of 1.2 billion yuan and a construction period of 15 months. It mainly produces lithium-ion batteries and lithium battery systems for energy storage and new energy.

The company has successfully implemented the sodium ion battery industrial and commercial energy storage system project and is operating stably. At the same time, it has received ...

Key projects include new energy storage cooperation, where Penghui Energy will provide Genaspi Energy with 1GWh high-quality energy storage cells for renewable energy ...

The project mainly produces lithium-ion batteries and lithium-ion battery systems, which are used in the energy storage market, and can form an annual production capacity of 10GWh of ...

There are currently three ways to produce a solid-state battery: polymer, sulfur/halide and oxide. Penghui Energy is pursuing the latter route and has already solved all hurdles related to ...
