---

How often should you update your solar inverter firmware? Most solar inverter manufacturers recommend checking for firmware updates quarterly and installing them within six months of release.

The process for updating firmware can vary significantly depending on the manufacturer and the specific components of your solar setup inverter, battery, monitoring device.

Factory firmware ending in GF must be updated. Never power down or modify wiring during an update. During the update, the Solar Inverter will reboot which will cause Wi-Fi to disconnect. When ...
