Ultimately, many factors figure into the price per watt of a solar system, but the average cost is typically as low as \$2.75 per watt. This price will vary if a project requires special adders like ground ...

Expect the cost per watt to be between \$2 and \$3 per watt. As of publishing, the average cost per watt is \$2.84. The key thing, according to Flores: "If you're closer to \$2 per watt, it's..."

HomeAdvisor's Solar Panel Price Guide gives the average home solar system and panel prices. Explore solar panel pricing per watt or square foot.

Solar panel costs range from \$16,600 to \$20,500 for the average 6.5 kW system, but prices can vary from as little as \$7,700 for smaller solar systems to upward of \$34,700 for larger systems.

Solar panels cost \$3.00 to \$4.50 per watt installed on average, with homeowners spending about \$3.75 per watt before factoring in available solar incentives. A 6- to 10-kW solar panel ...

Monocrystalline panels, known for their high efficiency and space effectiveness, tend to carry a higher price tag, ranging from \$3.00 to \$3.50 per watt. Conversely, polycrystalline panels, ...

Based on our 2025 survey of 1,000 solar customers, the national average price for a single solar panel professionally installed is \$1,200. This means most full-size systems of between 20 and 30 panels ...

While current pricing sits between \$0.65-\$1.25/watt for complete sun shed installations, technological advancements suggest potential cost reductions of 4-7% annually through 2030.
