-----

Focus on domestic hydrogen production through electrolysis powered by renewable and nuclear energy sources. Hydrogen infrastructure development includes modifying gas networks for hydrogen ...

Bratislava isn't just pretty - it's perfectly positioned. Nestled between Austria and Hungary, the city's large-scale energy storage acts as a "power sandwich" filling for Central Europe's renewable energy ...

Discover all relevant Hydrogen Station Manufacturers in Slovakia, including OXYWISE and AgeVolt

According to the 2025 Central European Energy Report, Bratislava's operational battery storage capacity reached 287 MWh this March - a 63% jump from 2024 levels.

The largest green hydrogen plant in Central and Eastern Europe to date, with a capacity of 10 megawatts, started operations at the MOL Group's refinery in Sz&#225;zhalombatta last year.

In cooperation with business partners worldwide we are offering tailored systems for production, storage, distribution & end-usage of hydrogen as well as other green solutions for cooling, heating and electricity.

This is served by the current modernization of the Bratislava filling station, as well as our investments such as our green hydrogen plant already launched in Sz&#225;zhalombatta, and a similar ...

Slovakia's natural gas sector is taking hydrogen quite seriously, getting itself ready to transport and store it. One result from their efforts is H2 Infrastructure (H2I), a ...
