The government announced the winners of LTESA Round 6 for long-duration energy storage today (5/2/2026). The round secured 1,171 MW / 11,980 MWh of long-duration battery ...

Australia is leading the global battery storage boom with AUD 2.4B invested in Q1 2025. Discover how big batteries are replacing coal, stabilizing the grid, and driving the nation's clean ...

The study found the highest lithium concentrations near the Mount Marion deposit of Western Australia, with elevated concentrations across the central western region of Queensland, southern New South ...

The Australian government's Department of Industry, Science and Resources has indicated that lithium-ion batteries are poised to "dominate" stationary storage for durations under 4 ...

Australia is well placed for battery manufacturing, thanks to: a history of pioneering battery and energy storage research. International companies are investing in Australian battery ...

Australia's lithium exploration has predominantly centred in Western Australia, but this research indicates the potential of other Australian regions, including Queensland, New South Wales ...

As of May 2024, there are only seven operational battery storage projects in NSW. This discrepancy highlights the challenges associated with financing and developing large-scale battery ...

Lithium-ion batteries (LIBs) have underpinned the growth of grid-connected energy storage for more than a decade. However, as Australia accelerates its renewable generation and ...
