Through the implementation of technologies across the food-energy-water nexus, this project represents a holistic and transformative approach to addressing the complex challenges faced by Bedouin ...

Israel was forced to temporarily shut down its main energy source, the offshore Tamar natural gas field. There are thousands of micro-grid projects already up and running around the world ...

As part of the contract, HomeBiogas will supply 20 Bio-Toilet systems, designed for infrastructure-limited environments. The systems address a need for off-grid, sustainable waste ...

A new demo village in southern Israel's Arava Desert showcases cutting-edge Israeli solutions for housing, energy, water and agriculture needs of populations out of reach of national ...

An IDF base in southern Israel has begun implanting the operation of "InfraBox," an off-grid infrastructure system combining solar panels, energy storage and smart microgrid technology.

Shahak Heights -- to be formally opened by President Reuven Rivlin in mid-January -- is the first of a series of planned temporary neighborhoods that are not connected to the urban ...

Of special interest are cases with an isolated grid such as Israel, with extensive work already carried out in the past on the evaluation of renewable electricity in this country. Yet, it ...

"This project supports Israel's 2030 energy storage targets and demonstrates how smart engineering and scalable technology drive long-term energy resilience and grid independence.
